

Environmental Engineering/Water and Wastewater Engineering (# questions in sub-bank)

General Water Supply Design Considerations (28)

Coagulation and Flocculation (16)

Lime-Soda Softening (3)

Ion Exchange (2)

Reverse Osmosis and Nanofiltration (6)

Sedimentation (3)

Granular Filtration (4)

Membrane Filtration (5)

Disinfection and Fluoridation (3)

General Wastewater Collection and Treatment Design Considerations (1)

Headworks and Preliminary Treatment (1)

Primary Treatment (2)

Wastewater Microbiology (4)

Secondary Treatment by Suspended Growth Biological Process (1)

Wastewater Plant Residuals Management (1)
