**PROPOSAL TO CHANGE THE "DESIGNATED COLLEGE SCHOLARS" POLICY AS APPROVED
BY THE EDUCATIONAL POLICY COMMITTEE**

COLLEGE SCHOLARS

On Honors Day each spring, the University designates outstanding students as College Scholars and Distinguished College Scholars, on the basis of registration and grade point average requirements for courses taken in residence at the University, as specified below. Students who are eligible for recognition receive invitations to the Honors Day convocation about three weeks before Honors Day.

To be designated a College Scholar, a student must meet all of the following requirements:

1. The student must be registered as an undergraduate in the current semester. Students who hold ~~an undergraduate~~ a bachelors degree or are registered in-absentia are not eligible.
2. The student must have completed at least thirty semester hours of coursework in residence at the University, and at least sixty semester hours of college coursework, including transferred work and credit by examination.
3. The student must rank in the top 20 percent of their class in each college or school in which he or she is pursuing a major, based on in-residence cumulative grade point average.
4. The student must have an in-residence University grade point average of at least 3.50.

To be designated a Distinguished College Scholar, a student must meet all of the following requirements:

1. The student must meet the first, second, and fourth College Scholar requirements stated above.
2. The student also must rank in the top 4 percent of their class in each college or school in which they are pursuing a major, based on in-residence cumulative grade point average.

Rationale: Students had voiced concern that they were not eligible to be College Scholars because they held Associates Degree. After discussion, the Educational Policy Committee thought that excluding students with associates degrees was not the intention of the policy. The policy means to exclude students with Bachelors degrees, because they would be likely to have the unfair advantage of having had more research experiences. The EPC discussed this at its meeting on October 5, 2015, and everyone thought that excluding students with associates degrees was not really justifiable and that it was not intended to be the policy.
