**Subject:** Technology-Enhanced Education Oversight Committee Legislation

Hi Jen,

At the December 5<sup>th</sup> faculty council meeting, the Technology-Enhanced Education Oversight Committee proposed policies on polling technologies and copyright ownership of educational content (D 14903-14905). The Provost's Office forwarded the legislation to Patti Ohlendorf, VP for Legal Affairs, for review. Patti suggested to Janet Dukerich the committee add a provision on D 14905 that allows for exceptions if the faculty member was paid by the University to create educational content with the expectation that it could be used by the institution freely based upon its dedication of such resources.

Our office is asking for the provision to be added and the legislation resubmitted for Provost McInnis' approval.

Please let me know if you have any questions or concerns.

Thank you, Michelle
