Connecting to the University of Texas VPN

Created by Laurie A Wood, last modified on Feb 28, 2017

VPN (Virtual Private Network) is required to access your campus desktop from off campus as well as other UT services.

- **VPN requires two-factor authentication using DUO.**
- To setup DUO for the first time: https://utdirect.utexas.edu/apps/duo/register/duo_login?next=/apps/duo/register/

Installing VPN (Application: *Cisco Anyconnect Secure Mobility Client*)

- **Engineering managed computer**
 - The application, *Cisco AnyConnect Secure Mobility Client*, should already be installed.
 - If you don't see it installed, open "Software Center" and choose to install it.
- **Personal computer: PC or Mac**
 - Go to <https://vpn.utexas.edu> and enter your UT EID and Password.
 - Authenticate with DUO.
 - Select the **Download** button to download and install the software.
- **Mobile Device**
 - Download the free *Cisco AnyConnect Secure Mobility Client* app
 - Users of iOS devices may download the app from the iTunes App Store.
 - Users of Android devices may download the app from Google Play.
 - Please be sure to keep the apps updated.

Connecting to VPN:

- Start the application: *Cisco AnyConnect Secure Mobility Client*.
- Enter the following:
 - Connect to: *vpn.utexas.edu*
 - Username: *YourEID*
 - Password: *YourEIDPassword*
 - DUO Passcode (or "Second Password" on mobile apps)
 - *push* << Sends a notification to your smart phone
 - *sms* << Sends an text to your cell phone
 - *phone* << Sends a call to your phone number
 - *<numeric passcode>* Generated from Duo App or text

Download & Install

Download Cisco AnyConnect Secure Mobility Client and install it on your computer.

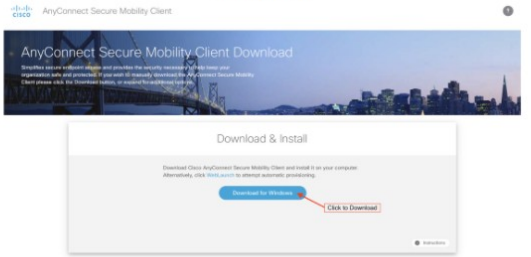

[Download for Windows](#)

[+ Instructions](#)

Instructions

INSTRUCTIONS

Step 1:

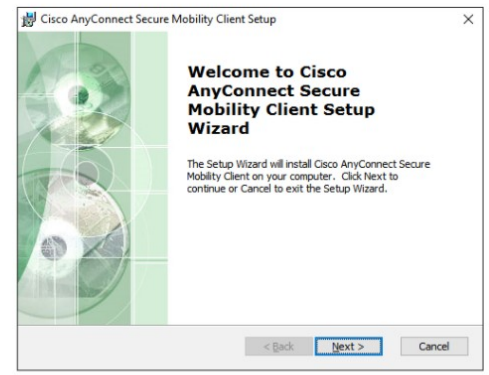

Click **Download** to save the installation package.

Step 2:

Locate and open the downloaded install package.

Step 3:

Click **Next** on the "Welcome to the AnyConnect Secure Mobility Client Wizard" screen.

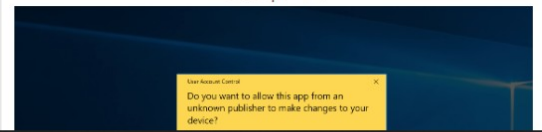

Step 4:

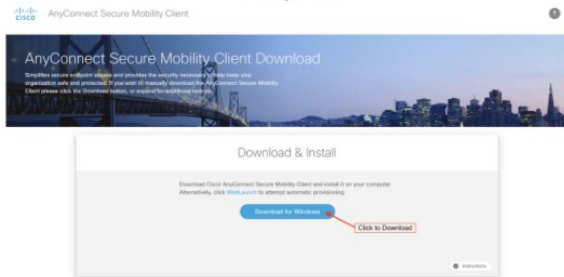

Step 5:

Step 6:

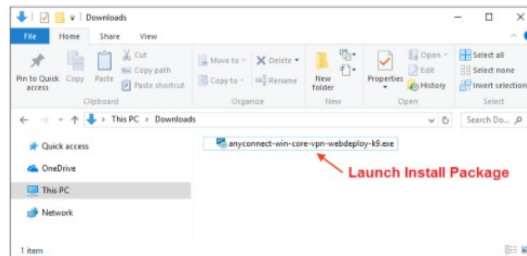

Step 1:

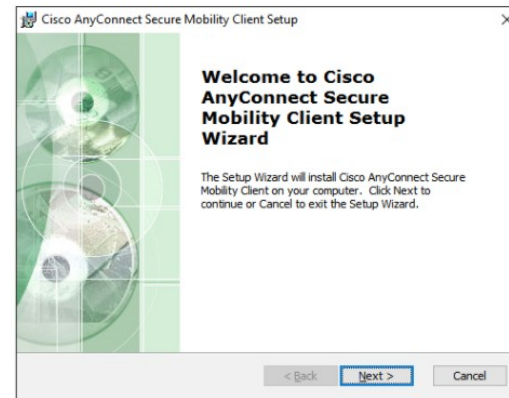

Click **Download** to save the installation package.

Step 2:

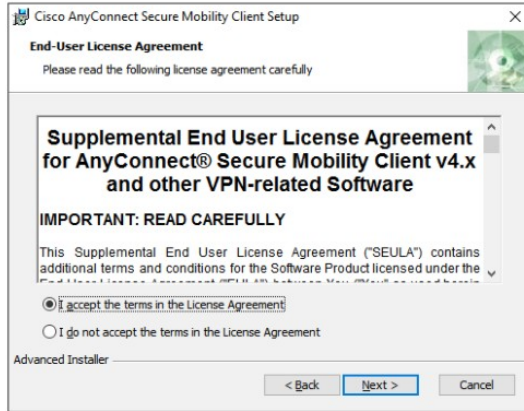

Locate and open the downloaded install package.

Step 3:

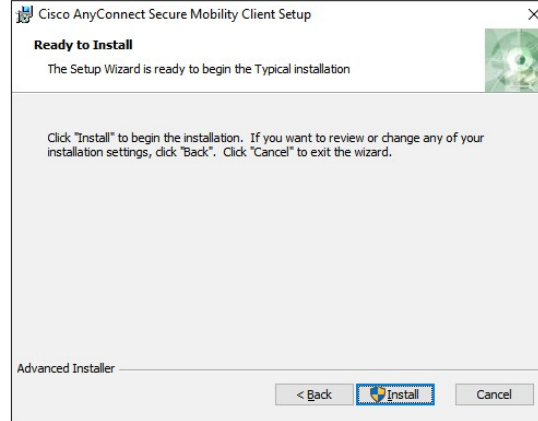

Click **Next** on the "Welcome to the AnyConnect Secure Mobility Client Wizard" screen.

Step 4:

Agree to the Software License Agreement and click **Next**.

Step 5:

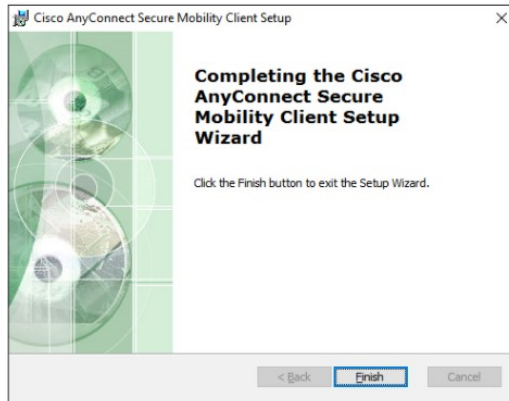

Click **Install** to begin installation.

Step 6:

You must have elevated privileges to install Cisco AnyConnect Secure Mobility Client. When prompted, choose **Yes** to proceed with installation.

Step 7:

You have successfully installed the Cisco AnyConnect Secure Mobility Client and can begin using it. Click **Finish** to exit the Setup Wizard.

Step 8:

Launch the Cisco AnyConnect Secure Mobility Client from the **Start Menu**.

Step 9:

To establish a secure VPN connection, click **Connect**.

Link for setting up 2-Factor Authentication using Duo:

<https://wikis.utexas.edu/display/comm/Duo+-+Two+Factor+--+Authentication+-+Mobile+Phone+-+How+to+Authenticate+Your+Cell+Phone>

Once you're connected to VPN:

You can log into the GSAF server using either ssh (*if you're on a Mac*):

- start terminal, enter command:

```
ssh studentNN@gsafcomp01.cccb.utexas.edu
```

(but replace **NN** with the two-digit number you've been assigned!)

- see <https://www.servermania.com/kb/articles/ssh-mac/> for more info

Or putty (*if you're on a Windows PC*):

- See remaining slides, which go through steps for installing from:

<https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html>

Download PuTTY: latest release (0.74)

[Home](#) | [FAQ](#) | [Feedback](#) | [Licence](#) | [Updates](#) | [Mirrors](#) | [Keys](#) | [Links](#) | [Team](#)

Download: [Stable](#) · [Snapshot](#) | [Docs](#) | [Changes](#) | [Wishlist](#)

This page contains download links for the latest released version of PuTTY. Currently this is 0.74, released on 2020-06-27.

When new releases come out, this page will update to contain the latest, so this is a good page to bookmark or link to. Alternatively, here is a [permanent link to the 0.74 release](#).

Release versions of PuTTY are versions we think are reasonably likely to work well. However, they are often not the most up-to-date version of the code available. If you have a problem with this release, then it might be worth trying out the [development snapshots](#), to see if the problem has already been fixed in those versions.

Package files

You probably want one of these. They include versions of all the PuTTY utilities.

(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

MSI (*Windows Installer*)

32-bit: [putty-0.74-installer.msi](#) (or by FTP) (signature)

64-bit: [putty-64bit-0.74-installer.msi](#) (or by FTP) (signature)

Unix source archive

.tar.gz: [putty-0.74.tar.gz](#) (or by FTP) (signature)

Alternative binary files

The installer packages above will provide versions of all of these (except PuTTYtel), but you can download standalone binaries one by one if you prefer.

(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

putty.exe (the SSH and Telnet client itself)

32-bit: [putty.exe](#) (or by FTP) (signature)

64-bit: [putty.exe](#) (or by FTP) (signature)

pscp.exe (an SCP client, i.e. command-line secure file copy)

32-bit: [pscp.exe](#) (or by FTP) (signature)

64-bit: [pscp.exe](#) (or by FTP) (signature)

psftp.exe (an SFTP client, i.e. general file transfer sessions much like FTP)

32-bit: [psftp.exe](#) (or by FTP) (signature)

64-bit: [psftp.exe](#) (or by FTP) (signature)

PuTTY README
=====
This is the README file for the PuTTY MSI installer distribution. If
you're reading this, you've probably just run our installer and
installed PuTTY on your system.

What should I do next?
-----
If you want to use PuTTY to connect to other computers, or use PSFTP
to transfer files, you should just be able to run them from the
Start menu.

If you want to use the command-line file transfer utility PSCP, you
will need to run this from a Command Prompt or equivalent, because it
will not do anything useful without command-line options telling it
what files to copy to and from where. You can do this by just running
the command 'pscp' from a Command Prompt, if you used the installer's
option to put the PuTTY installation directory on your PATH.
Alternatively, you can always run pscp.exe by its full pathname, e.g.
"C:\Program Files\PuTTY\pscp.exe".

(Note that a Command Prompt that was already open before you ran the
installer will not have inherited the update of PATH.)

What do I do if it doesn't work?
-----

The PuTTY home web site is
https://www.chiark.greenend.org.uk/~sgtatham/putty/

Here you will find our list of known bugs and pending feature
requests. If your problem is not listed in there, or in the FAQ, or
in the manuals, read the Feedback page to find out how to report
bugs to us. PLEASE read the Feedback page carefully: it is there to
save you time as well as us. Do not send us one-line bug reports
telling us 'it doesn't work'.
