# Presenting on the Samsung SmartTV

1. Turn the TV on with the remote.
2. Click "SOURCE" on the remote to get to the HDMI setting you want. You can either connect your computer directly with an HDMI cable or over AirMedia using an internet browser.

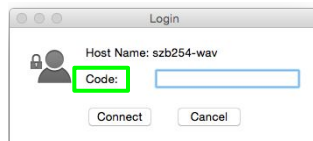

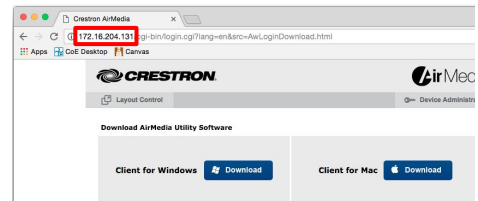

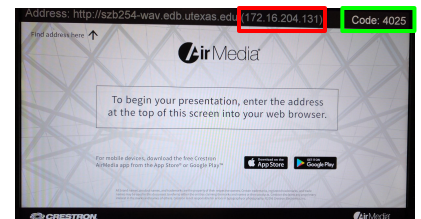

To connect over HDMI:

1. Locate the HDMI cable coming from the television, and plug it into your machine. If you do not have an HDMI port, you may need a dongle.

To connect over AirMedia:

1. Once the TV is set to the correct Source, you should see the screen on the right. Type the IP address at the top of the screen into a browser on your laptop.
2. If it's your first time connecting over AirMedia, you'll be prompted to download the software. Select your client and complete the download.
3. A window will appear prompting you for the code at the top right of the TV screen. Enter the code, and your presentation will begin.

If your display is cut off:

1. Press "MENU" on the remote.
2. Select "Picture Size".
3. Select "Screen Fit".
