

AVID-Setting the Media Creation Tool in AVID

January 27, 2009

More Info: susanne.kraft@austin.utexas.edu

<p>In an open AVID Project go to >Tools>Media Creation tool or select (apple 5)</p>	 <p>The screenshot shows the 'Tools' menu in AVID. The 'Media Creation Tool' is highlighted with a blue background and a red rectangular box around it. Other tools listed include New Deck Controller, Audio Mixer, Audio EQ, AudioSuite, Audio Tool (⌘1), Audio Punch-In, MetaSync Manager, Calculator (⌘2), Clipboard Monitor, Command Palette (⌘3), Composer (⌘4), Console (⌘6), Capture (⌘7), Effect Editor, Effect Palette (⌘8), Hardware, and Locators.</p>
<p>In the Media Tool set to Storage or Personal Hard Drive</p>	 <p>The screenshot shows the 'Media Creation - Current' dialog box. The 'Video Drive' dropdown menu is open, showing options: Storage (selected with a checkmark), HP x780w, Macintosh HD, (None), Change Group..., and All Available. The 'Apply to All' button is visible above the dropdown.</p>
<p>Select Apply to All in both places (circled) to apply the settings to all the effects titles and renders so that they all are saved to the correct drive.</p>	 <p>The screenshot shows the 'Media Creation - Current' dialog box with two 'Apply to All' buttons circled in red. One is located above the 'Video Drive' dropdown, and the other is located below the 'Audio Drive' dropdown.</p>
