On April 12, 2017, the Petroleum and Geosystems Engineering (PGE) faculty approved the proposal. It was approved by the Cockrell School of Engineering (CSE) Degrees and Courses Committee on May 24, 2017, and by Cockrell School of Engineering Dean Sharon L. Woods on September 18, 2017. The Secretary has classified this proposal as legislation of general interest to more than one college or school.

The Committee on Undergraduate Degree Program Review recommended approval of the proposal on March 7, 2018, and forwarded it to the Office of the General Faculty. The Faculty Council has the authority to approve this legislation on behalf of the General Faculty. The authority to grant final approval on this legislation resides with the Provost on behalf of the President.

If no objection is filed with the Office of the General Faculty by the date specified below, the legislation will be held to have been approved by the Faculty Council. If an objection is filed within the prescribed period, the legislation will be presented to the Faculty Council at its next meeting. The objection, with reasons, must be signed by a member of the Faculty Council.

To be counted, a protest must be received in the Office of the General Faculty by April 3, 2018.

**2. EXPLAIN CHANGE TO DEGREE PROGRAM AND GIVE A DETAILED RATIONALE FOR EACH INDIVIDUAL CHANGE:**

Petroleum and Geosystems Engineering 368 replaced with Petroleum and Geosystems Engineering 358. Replacement course will cover a significant portion of material that goes beyond well-logging interpretation, including applications in reservoir engineering, drilling, production, geophysics. The change is mainly meant to more accurately reflect the course as it has evolved.

**3. THIS PROPOSAL INVOLVES: (Please check all that apply)**

- Courses in other colleges
- Courses in proposer's college that are frequently taken by students in other colleges
- Flags
- Course in the core curriculum
- Change in course sequencing for an existing program
- Courses that have to be added to the inventory
- Change in admission requirements (external or internal)
- Requirements not explicit in the catalog language (e.g., lists of acceptable courses maintained by department office)

**4. SCOPE OF PROPOSED CHANGE:**

- a. Does this proposal impact other colleges/schools? Yes  No   
 If yes, then how would you do so?
- b. Do you anticipate a net change in the number of students in your college? Yes  No   
 If yes, how many more (or fewer) students do you expect?
- c. Do you anticipate a net increase (or decrease) in the number of students from outside of your college taking classes in your college? Yes  No   
 If yes, please indicate the number of students and/or class seats involved.
- d. Do you anticipate a net increase (or decrease) in the number of students from your college taking courses in other colleges? Yes  No   
 If yes, please indicate the number of students and/or class seats involved.

**If 4 a, b, c, or d was answered with yes, please answer the following questions:**

**If the proposal has potential budgetary impacts for another college/school, such as requiring new sections or a non-negligible increase in the number of seats offered, at least one contact must be at the college-level.**

#### Curriculum

Course requirements include courses within the Cockrell School of Engineering and other required courses. In addition, each student must complete the University's Core Curriculum. In some cases, a course that fulfills one of the following requirements may also be counted toward core curriculum or flag requirements; these courses are identified below.

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the US flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and both writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements are identified in the *Course Schedule*.

Courses used to fulfill technical and nontechnical elective requirements must be approved by the petroleum and geosystems engineering faculty and the geological sciences faculty before the student registers for them.
