**BACHELOR OF SCIENCE IN APPLIED LEARNING AND DEVELOPMENT (ALD)**

All-Level Generic Special Education (SED) leads to Texas certification to teach individuals with disabilities, in a variety of settings, including children and youth with mild to moderate disabilities, as well as those with severe and/or multiple disabilities.

Early Childhood to Sixth Grade ESL Generalist (ESL GEN) leads to Texas certification to teach in elementary school classrooms. This interdisciplinary major allows students to explore developmental issues of children, learning theory, elementary school content, ESL, teaching methods, and includes a strong component of field experience in public schools.

Early Childhood to Sixth Grade Bilingual Generalist (BIL) leads to a Texas certification to teach in a bilingual or general elementary classroom. The bilingual program at UT is specifically focused on educational issues that relate to students whose first language is Spanish and, for this reason, fluency in Spanish is required.

Youth and Community Studies (YCS) prepares students to work with children and youth in settings that do not require teacher certification. Students who choose this major have the flexibility to select courses from one of the following professional concentrations: coaching, early childhood, special populations, and youth and social services.

---

**BACHELOR OF SCIENCE IN KINESIOLOGY AND HEALTH EDUCATION (KHE)**

Exercise Science (ES) includes courses in anatomy, exercise physiology, biomechanics, and motor development. Many graduates pursue graduate or professional study in areas such as exercise and sports science, sports medicine, physical therapy, occupational therapy, or other allied health professions.

Applied Movement Science (AMS) prepares students to become health and fitness professionals. Students interested in personal training, strength and conditioning coaching, sport performance coaching, sport coaching, teaching physical education, physical activity public health specialist, and other fitness related fields will be prepared to sit for various certification exams that lead to these positions.

Health Promotion and Behavioral Science (HP) is an interdisciplinary major focused on preventing negative health outcomes and promoting optimal health through individual, organizational and community change.

Sport Management (SM) prepares students for a career in the management, marketing and administration of sports programs in educational, business or entertainment industry settings. Students complete a semester-long internship, and must complete specific prerequisites and a separate application for administration to the major.

Physical Culture and Sport (PCS) explores sports and exercise through a humanities/social science approach. Graduates pursue careers in journalism, youth sports development, sports law, public relations, governmental and sport agencies, community-based sports programs, and coaching.

---

**BACHELOR OF SCIENCE IN ATHLETIC TRAINING**

Athletic Training Program (ATP) prepares students for careers in athletic training, general medicine, sports medicine, physical therapy, occupational therapy, or other allied health care professions. This highly competitive major requires prerequisites and a separate application for admission.
