python-intro

Python is a scripting language. It is installed on the clusters as /share/apps/python (or /share/apps/python-ver for a version specific directory as we usually keep several around). The following modules should also normally be installed:

- Bio
- BioSQL
- Martel
- mx
- Numeric
- numpy

Other python library.

Installation Instructions

- configure --prefix=/share/apps/python-ver
- make test
- make install
- install modules
  - setuptools
  - nose
  - numpy
