Food + City

| Description                                                                 | Food+City grew out of The Food Lab at the University of Texas at Austin. As a multimedia platform that explores and motivates innovation within the global food system, Food+City aims to raise awareness of the opportunities for improvement in our food systems and uncover insights that will shape how we make our world sustainable. Food + City hosts events and offers the Challenge Prize, an early stage business startup competition encouraging innovation within the urban food system, which accepts submissions in early fall for the competition in February. |
