**Description:** Working with UT Austin and local organizations and incubators, the center fosters startups created by faculty and students by bringing to the table the right partners, suppliers, investors, employees and customers, while serving as advisers and mentors throughout. The center collaborates with groups across campus, across the UT System and across the state of Texas, such as chambers of commerce, accelerators and funding sources, including the Horizon Fund, the Central Texas Angel Network, the Rice Alliance and other venture capital and angel networks.
