

Adobe Premiere - Set Audio Tracks Prior to Editing

WARNING!

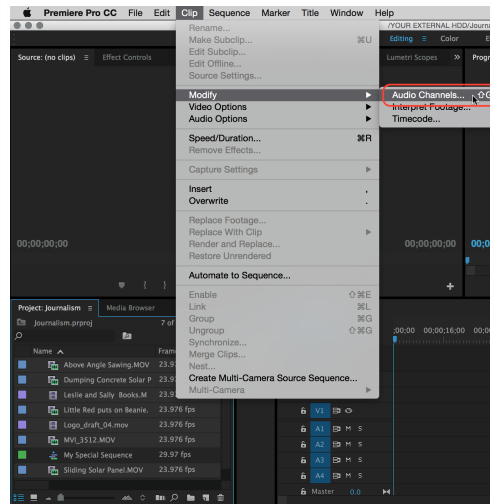

If you proceed to edit without following the next steps, your audio may not work correctly!

Select all of your imported footage

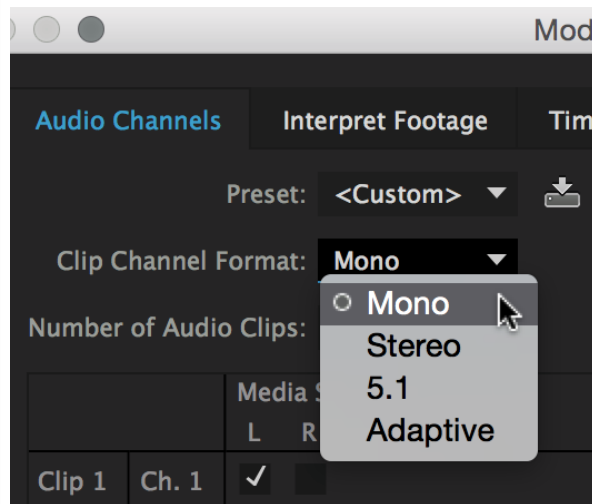

From the clip menu choose "Modify > Audio Channels..."

or

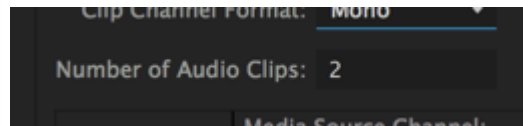

Press Shift + G

Select "Mono" from the "Clip Channel Format" drop down

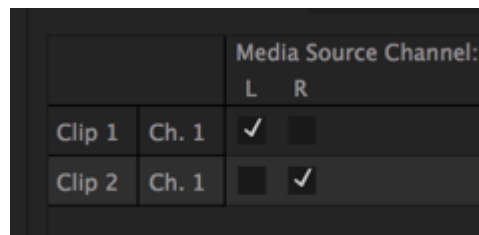

Set the "Number of Audio Clips:" to 2

Route your audio

Click OK

Drag you clips into the timeline

If you get this warning, choose "Keep existing settings"

Clip Mismatch Warning

 This clip does not match the sequence's settings. Change sequence to match the clip's settings?

Always ask
