

Adobe Photoshop - Printing using Color Calibrations

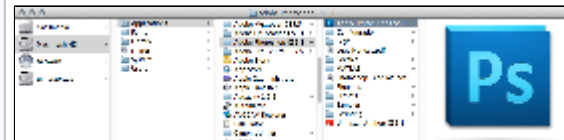

Follow these steps in order to fully utilize the color calibration settings set up for the PhotoJournalism Lab.

<p>Go to the Apple Menu in the Finder and select System Preferences.</p>	
<p>Select Displays.</p>	
<p>Select Color.</p>	

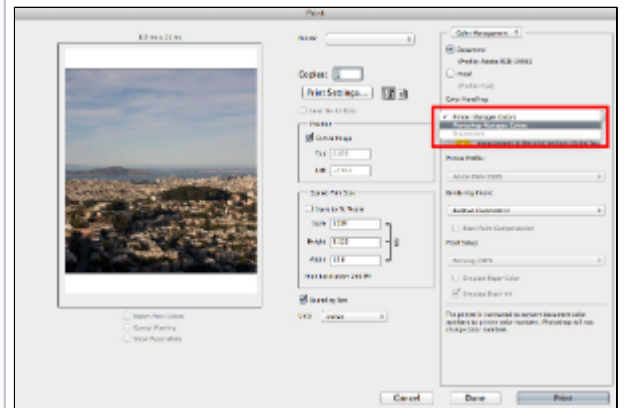

Select **PJDisplay**.

Open **Photoshop** in Macintosh HD>Applications>Adobe Photoshop CS5. Open your Photo and make whatever edits need to be done before printing.

Go to **File>Print**. To the upper left under **Color Handling** select **Photoshop Manages Colors**.

Select underneath **Color Handling** the **Printer Profile** drop-down menu.
