Required Exams and Fees for Initial Teacher Certification

All students enrolled in teacher certification programs at the undergraduate, post-baccalaureate, or graduate level are required to take the appropriate Texas Examinations for Educator Standards tests (TExES) before they can be certified. Students are granted test approvals during the last two semesters of the PDS. Please note that students are limited to a total of five test attempts per certification exam. Please visit the Texas Education Agency's Educator Testing page for more information, including an FAQ on examination retakes.

For a breakdown on all fees associated with preparing for the teacher certification, please refer to the Teacher Certification Fees page.
