Sony LMD 425 Stereoscopic 3D Video Monitor - How to set for normal 2D screening

Make sure the Thunderbolt cable is connected to the Ultra Studio 3D.
Make sure the Thunderbolt cable is plugged into the iMac

Then go to the >Apple >System Preferences
Desktop Video Setup

Make sure the UltraStudio is being seen by the computer
Go to System Preferences on the iMac

Click on the UltraStudio 3D icon
Audio change to XLR

Change your sound output to Blackmagic Audio
Now set up the Sony LMD4251TD

Turn on the monitor
