Burn a data DVD or CD using Roxio Easy Media Creator:

1. Open Roxio Easy Media Creator
2. Click Data Copy files to disc

Select > Data Disc under the Common Projects section

Find the folder or files and folders to record on to the CD or DVD from the Source window and drag it to the Data Disc Project window

Then click the "Burn" icon to record the disc. At the next screen, click on the "Details" button to enter in the appropriate burning information.
Enter in: Write Speed=8x (slower the better just in case) # of copies needed and make sure the Buffer Underrun Prevention is on

THEN PUT YOUR DISK IN THE OPTICAL DRIVE AND CLICK BURN TO BURN THE DISK
