Neewer Foldable 256 LED Lighting Panel on Fabric

This flexible light panel consists of 256 pcs energy-saving LED bulbs with Maximum 4500lm for providing superior lighting. Rollable design makes it portable to carry around and it can be bent arbitrarily to control the light spread in any way you could imagine; Ultraportable, ideal for travelling filmmakers and outdoor photographers. It will not flicker even if at low brightness. 4 plastic connection rods can be put around the lighting panel to firm the LED light, which makes the fabric light more operational. Outer White Diffusing Cloth can diffuse the harsh light and eliminate the brightness spots. Wireless remote control provides 4 channels for you to adjust the brightness and color temperature of the light.
