Adobe Premiere Pro - How to Reconnect or Relink Offline Media

This will show you how to fix problems with media that's offline.
RED in your Sequence. Clips will also show as offline in your project window.
To fix this you can right click on your timeline and choose Link Media...
Or you can select multiple offline clips in the Project Window and choose > Link Media...
In our example we only have two offline clips. You may have more...

But select one and choose 'Locate'.
Choose to display only exact name matches to make things easier to find.
Cl ick OK when you have navigated to the file and selected it.
Not only will the first of flight you wear looking for will resemble but very thin that is in the same file at will resemble.
