**Mpeg Streamclip – How to convert h264 to ProRes or AVID DNxHD quicktimes**

1. Open Mpeg StreamClip
2. Go to >List>Batch List
3. Choose Add Files
4. Navigate to the files you want to convert to quicktime
5. Select all of them
6. Click on To Batch
7. Choose Export to QuickTime
Select the Destination Folder

Click Select

Choose the following QuickTime exporting settings

Compression – Apple ProRes 422
Choose 1920 x 1080 unscaled

If you don't have the ProRes Codec then use the DNxHD codec with the same settings as above
Next select >Go

When Finished all files will state they are completed
