Davinci Resolve - Export ProRes Uncompressed Files for Color Correction

Recommended for sessions not going back into AVID or Premiere - Final Export Deliverable is out of Davinci Resolve

First open up your project in Resolve
Go to the Deliver tab
Choose Premiere XML

Click on the Audio Tab turn off Export Audio

Go to the Video tab
Choose Quicktime
ProRes HQ
Render at Source Resolution
Click on Advanced Settings
Choose Retain sub-black and super-white data
Also add 5 frames of handles
He'll need the XML and all the HQ quicktimes
With the QT ref we made today
