How to use your own computer to view & record cameras in CMB1 Behavioral Science Lab

You are not required to use the computers provided in the Behavioral Science Lab in order to view and record video from the various experimental rooms. Note that Communication Technology Services only provided support to computers owned by the College. We cannot help you with technical issues on your personal computer. If you cannot make the cameras work with your computer, please use the computers provided in the lab.

- Viewing video cameras in CMB1 Behavioral Science Lab on a personal computer
- Recording video from cameras in CMB1 Behavioral Science Lab

### Viewing video cameras in CMB1 Behavioral Science Lab on a personal computer

1. Go to Usher ([http://usher.communication.utexas.edu](http://usher.communication.utexas.edu)) and log in with your EID and password.

2. Click on “Behavioral Science Lab”. If you do not see this link, contact your research coordinator as your EID is not currently authorized to access the video cameras.

3. Click on the camera you wish to view and log in with the provided username and password. Note: you must be on campus to view cameras.

4. If you are using Internet Explorer, you will be asked to allow installation of the AXIS add-on and you will also be required to click on the link to install the H.264 Decoder, which is located on the same page. If you are using any other browser, you must have Quicktime Player installed on your computer before you can view the camera.

### Recording video from cameras in CMB1 Behavioral Science Lab

You must use Internet Explorer on a Windows computer to record video from the cameras in the CMB Behavioral Science Lab

1. In Internet Explorer, go to Usher ([http://usher.communication.utexas.edu](http://usher.communication.utexas.edu)) and log in with your EID and password.

2. Click on “Behavioral Science Lab”. If you do not see this link, contact your research coordinator as your EID is not currently authorized to access the video cameras.
3. Click on the camera you wish to view and log in with the provided username and password. Note: you must be on campus to view cameras.

4. Click Install when the prompt to allow installation of AXIS Media Control appears.

5. Click on the "Click here to install or upgrade the H.264 Decoder" link. If you get a prompt about temporarily allowing popups for the website, click Allow.

6. When the popup box appears, accept the license agreement and click Ok.

7. Click Install when the prompt to allow installation of AXIS H.264 Decoder appears.
