What's New in Quest?

March 2020

Instructors:

- Online testing via learning modules in test mode (>300k tests already administered!)
- Proctoring overlay for online assessments
- Matrix style free response questions
- Security and Performance upgrades

Students:

- Errant UTLogoff timeframe relaxed in times of latency—thank you for your Fall 2019 survey input concerning this!
- Personalization of custom review questions
- Solutions offered to custom reviews (instructor released)
- Remaining spring ’20 unpaid students fee waived given COVID-19 crisis
- (any starting to use Quest after spring break will not be billed for spring ’20)

System performance:

- Faster user interface
- Increased server capacity
- Security and Performance upgrades

Sustained Enhancements

Instructors:

- Allow bulk late submit for students added to course late
- Delete personal bank item questions (in editor)
• Static level preview of an assignment (to be able to discuss with support team without everyone having a different version)
• **Modern search tool**, complete with question tags to filter, and institutional history success rate!
• Bubblesheet scanner for Quest exam use in PMA (RLM) 15.320
• Addition of Time Zone specific handling

*Students:*

• Elimination of Negative Point (guessing penalty) as default grading behavior (since spring 19)
• Delete old custom reviews using the red trash can
• We're hearing you'd like more explanations! Please help us identify areas of greatest need by highlighting areas that are lacking.
