

# Software Downloads

## Autodesk:

1. Students must register at [students.autodesk.com](https://students.autodesk.com) to obtain a serial number for product activation.
2. Once registered, locate the Autodesk software you need here: <https://www.autodesk.com/education/edu-software>
3. Use the Autodesk Download Manager to acquire and install your software.
4. Use the Autodesk Desktop App to keep your software up to date.

We provide the following network shares:

1. **Arc-GIS-Student:**  
( \\arch-data.austin.utexas.edu\Arch-GIS-Student )  
This read-only share contains a copy of the ArcGIS software typically available from the [ESRI Website](#). It is preferred that students on-campus download these files from this share instead of directly from ESRI in order to conserve the university's internet bandwidth.
2. **gis-data:**  
( \\arch-data.austin.utexas.edu\GIS )  
This read-only share has a variety of GIS data available to all UTSOA students for use in GIS courses, projects, and analysis.
3. **TransCAD-Student:**  
( \\arch-data.austin.utexas.edu\TransCAD-Student )  
This read-only share contains a copy of TransCAD 5.0 in a compressed zip file for download. A USB network license key with serial number is available for signout at the SOA Service Desk in the Technology Lab.  
**How to license your Transcad software using the Transcad licensing dongle:** [TransCAD Licensing](#)

**Special Course or Project shares:** If you require a place to store and share files for your project or course, please first review the other files-sharing options such as Box. Please note that we are no longer able to provide network storage shares.
