

# Graduate Student Profiles on the College of Education Website

College of Education graduate students now have the capability to update their profiles that appear on the College of Education website. Your contact information that appears in the UT Directory will be brought over by default. It is up to you to add additional information such as your areas of interests, bio, achievements, CV, and photo. Please note that the college website follows [AP Style](#), so we encourage you to keep these guidelines in mind as you draft your bio. We also encourage you to have someone else proof your bio before you upload it.

To update your profile, log on to <https://apps.jsg.utexas.edu/profiles> with your UT EID and password. The system is fairly intuitive. As you'll see after you log on, there are a series of tabs to go through for adding information. If you already have a profile on the college website, copy and paste the information from your current profile page to the system. There are a few differences to note:

- Your full bio should be added to the Biography tab under About You.
- Your Areas of Interest should be added to Short Bio/Areas of Interest field under the Research tab, Your Research sub tab.
- There's no need to add any punctuation to any of the Publication fields.
- You can connect your profile to your supervising faculty member's profile under the Supervisors tab.

See [here](#) for more detailed instructions.
