

GPA Requirement

To graduate, all students must have a graduate grade-point (GPA) average of at least 3.00. The GPA includes all graduate courses and upper-division undergraduate courses in which the student earns a letter grade while he or she is enrolled in the Graduate School.

Some supplemental and major fellowships require at least a 3.50. If you have been awarded a fellowship, please check the award documentation for any GPA requirements to maintain your fellowship eligibility.

For more information on how the BME Department assesses satisfactory academic progress, see the [Annual Reviews](#) page.
