Student Listserv Migration

Overview

In advance of the migration of Office365 email services in October, we are migrating student mailing lists to a service called Listserv. This will allow for you as list managers and Computer Services to maintain the level of service and customization we are used to with our student mailing lists. Once migrated, all existing mailing list email addresses will continue to work and forward to the new lists. Newly created mailing lists will be named in the format of listname@lists.mccombs.utexas.edu. If you’re a list manager, you will be able to edit your list's membership from the Listserv site. Members or subscribers to your lists will be able to update their email addresses and membership directly from the Listserv site.

When

Computer Services started the process of registering list managers on the new Listserv service the week of August 14th. We plan to complete migrations of of lists by September 1st.

What do I need to do?

If you are a list manager, start by registering for a Listserv account. We will follow up when your list is ready to be managed in Listserv.

How do I get help?

Please refer to the documentation below for Listserv, including registration, managing your lists and student subscriber information. If you have additional questions, please contact austinmigrationproject@mccombs.utexas.edu.

Documentation

- Listserv - Register for an account
- Listserv - Verify List Membership
- Listserv - Managing List Subscribers
- Listserv - How to Update your Subscribed Email Address (For Students)
- Listserv - How to Update Your Subscription Settings to Get a Copy of Your Sent Message (For Any Senders)

Communication

Email communication was sent to student mailing list managers on Friday, August 18th.
