

Sony F5

The **Sony PMW-F5 CineAlta Digital Cinema Camera** features an 8.9 MP Super 35mm image sensor capable of capturing 2K and HD internally in Sony's XAVC codec onto SxS PRO+ memory cards. It features 14 stops of dynamic range, applicable to both RAW and XAVC recording as long as S-Log is turned on, for truly film-like rendering of highlights and shadows. The camera natively features an FZ mount and includes a PL-mount adapter and an EF adapter.
