

# Multiple Choice - HTML based Questions

Welcome to creating simple multiple choice questions!

In this guide you'll learn how to use the multiple choice editor. It will cover the following topics:

- The user interface
- Adding and removing choices
- Adding and removing parts
- Publishing the question

 If you need assistance creating questions feel free to [email](#) us!

This is what you should see when you [create a new multiple choice](#) question.

The user interface is grouped into sections.

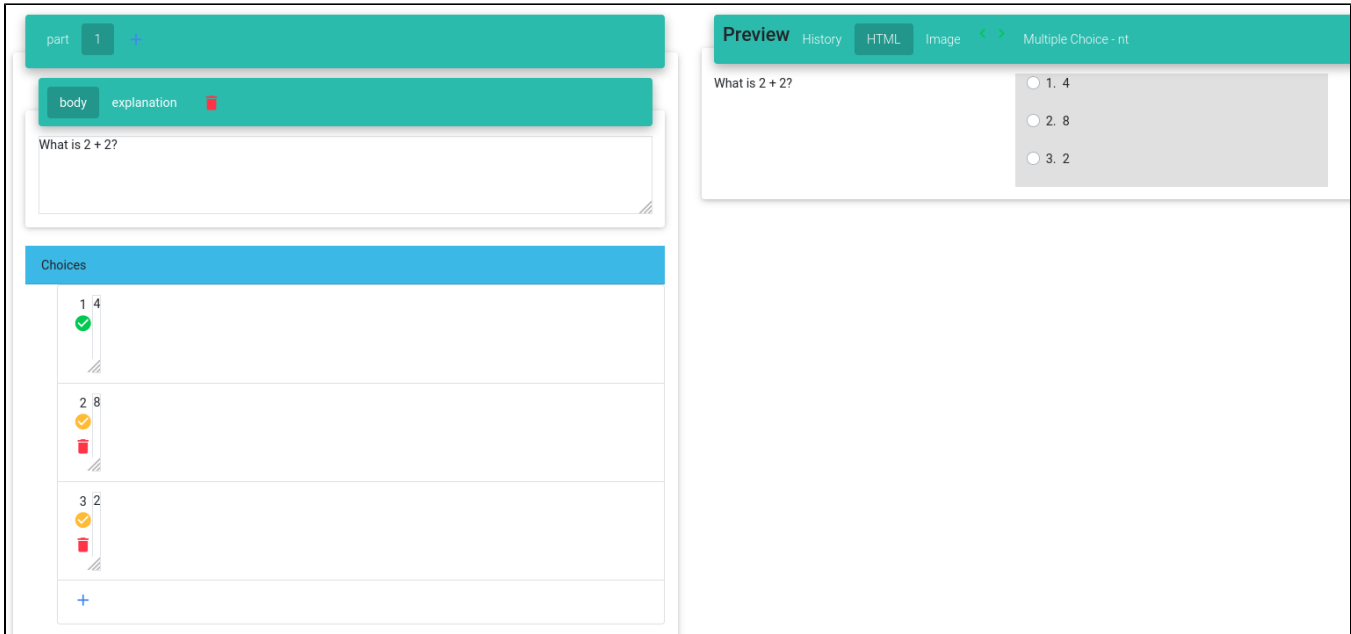

Section	Description
Part	Use this section to add more parts to your question (click the +).
Body/ Explanation	Clicking on the tabs lets you type the question or the explanation.
Choices	In this section you can type possible answer choices.

 The question will automatically update when any of the text boxes are updated.

You can add multiple choice items by clicking the "+" button at the bottom of the current choice and delete them by pressing the trash can icon respective to the choice you want to remove.

 Make sure you select the correct answer choice. Do this by clicking the check mark below its enumeration. The correct answer choice is represented by a green check mark.

The following is an example of a question:

When you're done writing the question make sure to review it one last time then hit the publish button at the top of the page.

Multiple Choice - nt

#219655

v.1

NonTeXMC

PUBLISH

1 Draft

2 Passed Audits & Tex

3 Parameters Generated

4 Published

Once the question is published it will no longer be editable.

Congrats!! 😊

You've created a simple multiple choice question.
