

AirMedia

Mac:

Important

For Mac please do NOT navigate to the website and download the installer as instructed on the projector.

1. Download the Mac installer: <http://utexas.box.com/airmedia>
2. Run through the installer (this will **require a reboot**)
3. Open the Application (Applications>Crestron>AirMedia>AirMedia.app)
4. Wait for the IP dialogue box to appear

5. Enter the IP address and code displayed on the projector

Tip

If you are having trouble with displaying audio, mute then unmute the sound using the volume button in the Crestron App.

Windows:

1. Download the Windows installer by navigating to the IP address displayed on the projector in your web browser
2. Run through the installer

3. If prompted, allow access incoming connections

4. Wait for the app to launch, then enter in the code that is displayed
