

Adobe Premiere Pro - How to Reconnect or Relink Offline Media

This will show you how to fix problems with media that shows as offline or

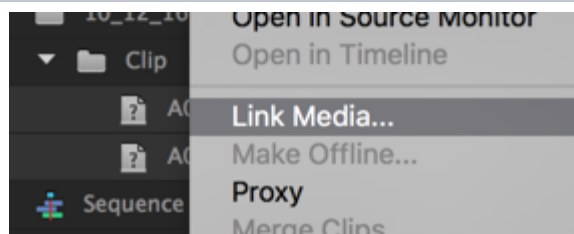

REDD in your Sequence. Clips will also show a slice of the timeline in your Project window

To fix this you can right-click on your timeline area of film clip and choose Link Media

Or you can select multiple of fine clips in the Project Window and choose > Link Media

In our example we only have a video of a film clip. You may have more... But select one and choose Locate

Link Media

 Link media for these clips:

Clip Name	File Name	File Path	Media Start	Tape Name
A001C001_161012EW.MXF	A001C001_161012EW.MXF	/Volumes/tempstorage/10_12_16 Card 01/XDRO	00:50:04:08	
A001C002_161012YD.MXF	A001C002_161012YD.MXF	/Volumes/tempstorage/10_12_16 Card 01/XDRO	00:51:24:04	

Match File Properties

☒ File Name

☐ Media Start

☐ Description

☒ File Extension

☐ Tape Name

☐ Clip ID

☒ Align Timecode

☒ Relink others automatically

☒ Preserve Interpret footage settings

☒ Use Media Browser to locate files

Processed 0 of 2 clips

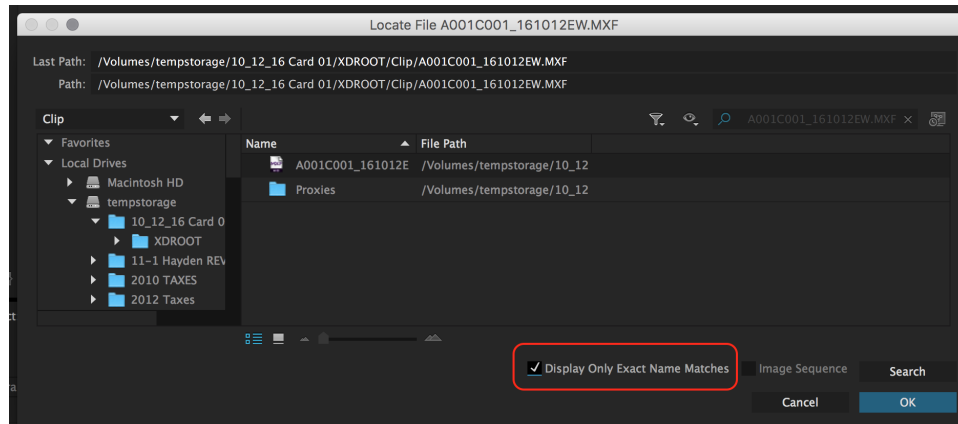

Offline All

Offline

Cancel

Locate

Choose to display only Exact Name matches to make things easier to find.
