# DaVinci Resolve - How to Fix a Resolve Project that Won't Round-Trip Back Into AVID

This is a fix for projects that need to be imported back into AVID after Color Correction but there has been a change or "Edit" in Resolve
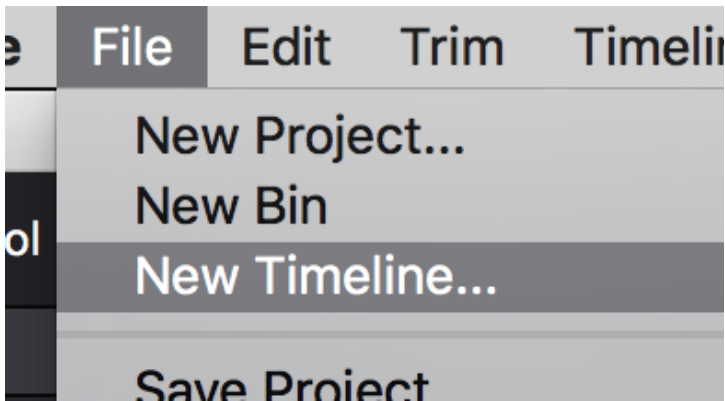

If the timeline is not opening up in AVID after an .aaf export out of Davinci Resolve the fix is to make a copy of the timeline and re-export	
Make a new timeline in Resolve >File >New Timeline	

Title the timeline and select the number of video tracks and audio if any?

Click Create

New Timeline

|	
Start Timecode	01:00:00:00
Timeline Name	My Revised Edit From Resolve
No. of Video Tracks	1
No. of Audio Tracks	1
Audio Track Type	Stereo

☑ Empty Timeline

☐ Use Selected Mark In/Out

Cancel   Create

Load the finished timeline that you already color corrected/exported then select all the clips by click "Command A"
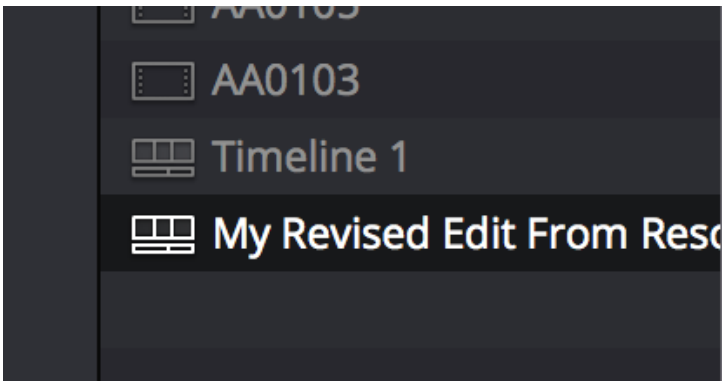

Edit	Trim	Timeline	Clip	Mar
Undo				⌘Z
Redo				⇧⌘Z
Cut				⌘X
Ripple Cut				
Copy				⌘C
Paste				⌘V
Paste Insert				
Paste Attributes...				⌥V
Delete Selected				⌫
Ripple Delete				⇧⌫
Select All				⌘A
Deselect All				⇧⌘A

AA0108 AA0104 AA0102 A00... AA0108
AA0108 AA0104 AA0102 A00... AA0108
AA0108 AA0104 AA0102 A00... AA0108
A00...
A00...

Then copy the clips by selecting "Command C" or Edit>Copy	**Edit** Trim Timeline Clip Undo ⌘ Redo ⇧⌘ Cut ⌘ Ripple Cut **Copy** ⌘ Paste ⌘
Load the newly created timeline by double clicking it in the	AA0103 AA0103 Timeline 1 **My Revised Edit From Res**
Then paste the clips you copied from the original timeline	**Edit** Trim Timeline Clip Undo ⌘ Redo ⇧⌘ Cut ⌘ Ripple Cut Copy ⌘ **Paste** ⌘
