

AVID - How to Make a 2K 5.1 Surround Sound QuickTime Using Your Surround Sound Mix - Use for DCP Screening

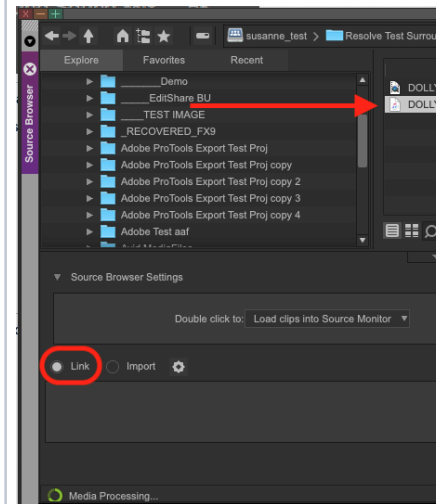

If your mixer did not give you "One" file that contains 6 channel but instead gave you 6 separate .wav files then use this workflow

[AVID - How to Make a 5.1 QuickTime Using 6 separate files Left, Right, Center, Lfe, Ls, Rs](#)

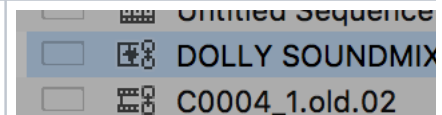

Open your AVID Project	
	Make a New Bin to import your surround sound
	Title the bin how you wish
Link to the Surround Interleaved file that you received from the mixer Go to >Tools>Source Browser>	

The file will be a 5.1 Full Mix.wav file

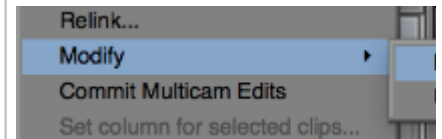

Click on Link

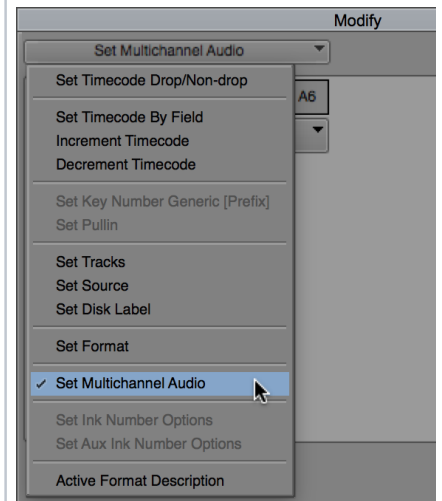

The file will appear in the bin

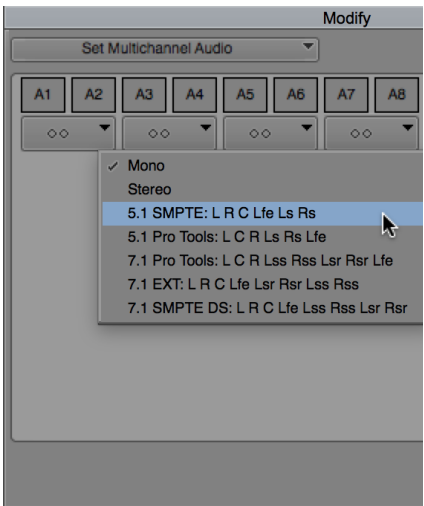

Right click on that linked file in the bin and choose Modify > Modify Clip...

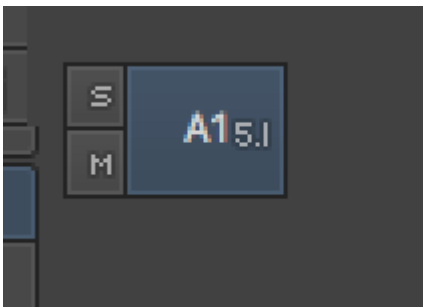

Choose Set Multichannel Audio from the drop down

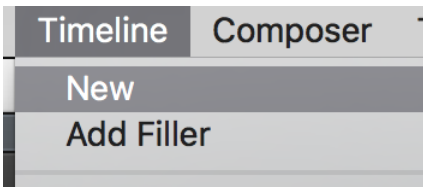

Choose 5.1 SMPTE: L R C Lfe Ls Rs

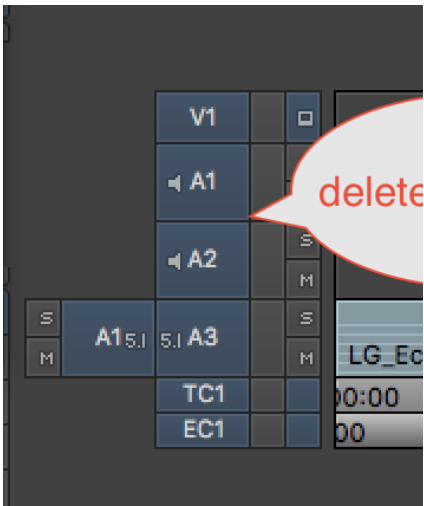

When you load it into the source window the file will have a 5.1 icon on it shown here

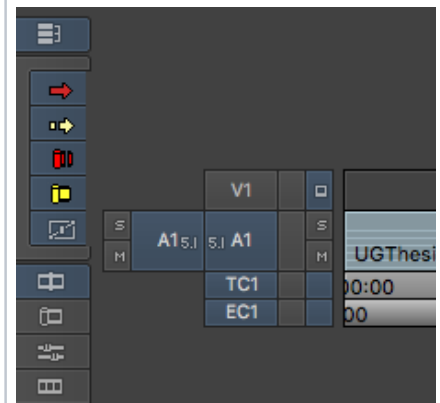

Create a new sequence and edit the 5.1 audio into the new timeline and then delete the other audio tracks that are automatically generated in the timeline

delete the other audio tracks that are automatically generated in the timeline

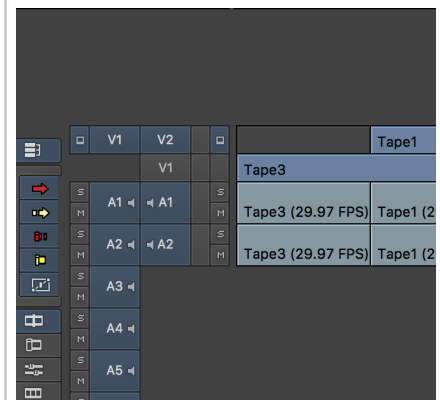

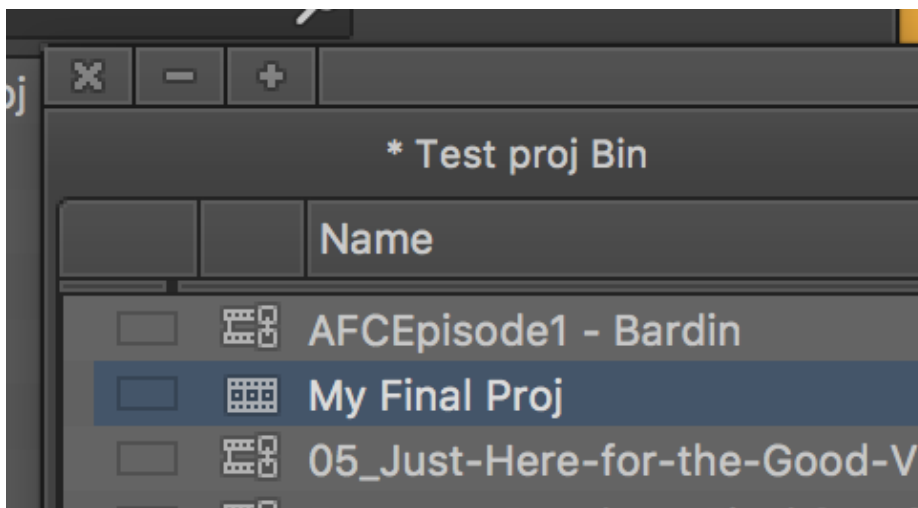

Edit the 5.1 audio file into this new timeline

Next need to make your video file to overwrite the 5.1 audio file

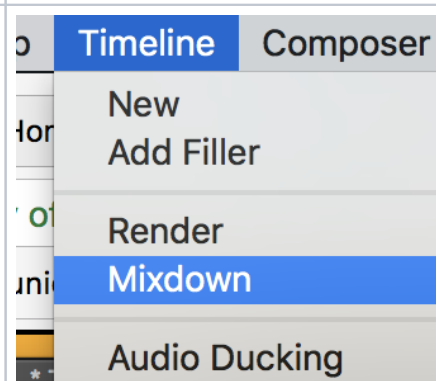

Select your final color corrected timeline in the bin and double click it to load it into the timeline interfacee

Next choose Timeline>Mixdown>Video

NOTE:

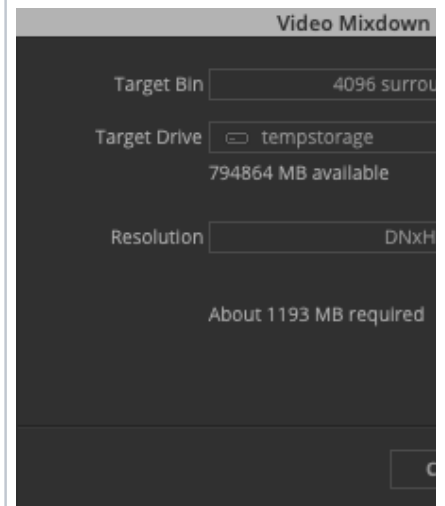

You don't have to do this video mixdown if you want to use the video track from another timeline.

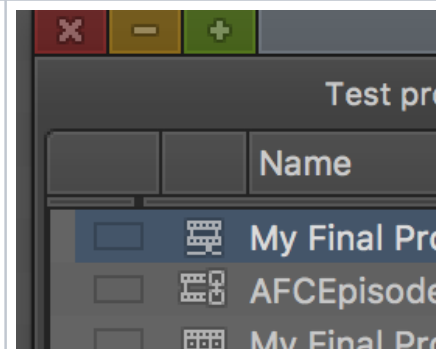

Choose the bin in AVID you want to save the file

Choose where the .MXF will be saved (your hard drive)

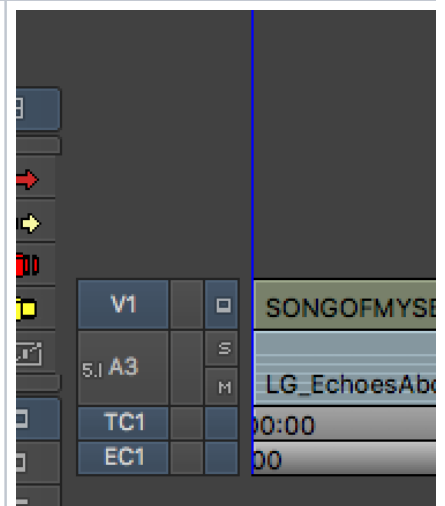

Resolution DNxHR HQ

You will end up with a file titled Video Mixdown after the title of your timelin

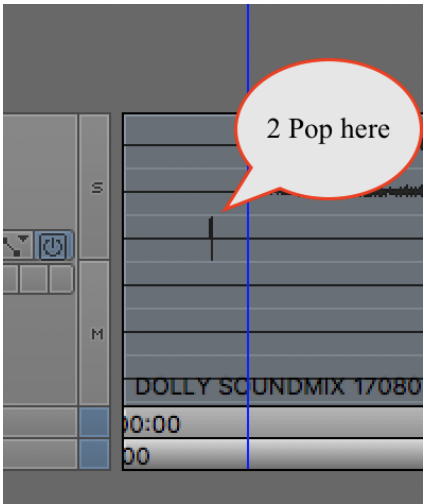

Load that video mixdown clip into the source browser and edit that on to the newly created 5.1 timeline that contains the 5.1 audio.

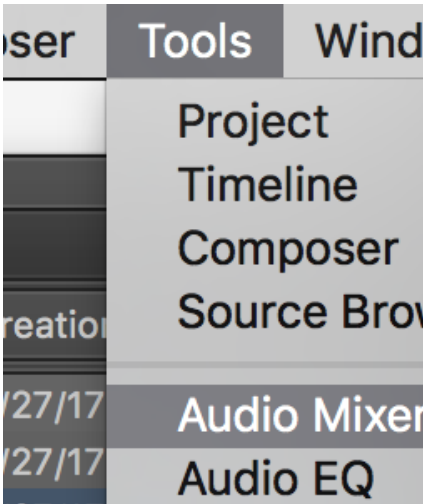

Check the Sync of the entire movie before exporting

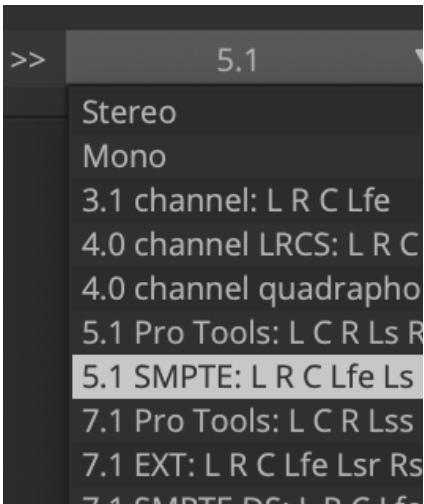

Remove the 2POP from the timeline at the head and tail.

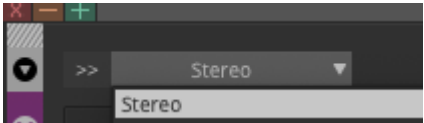

Next go to >Tools Audio Mixer

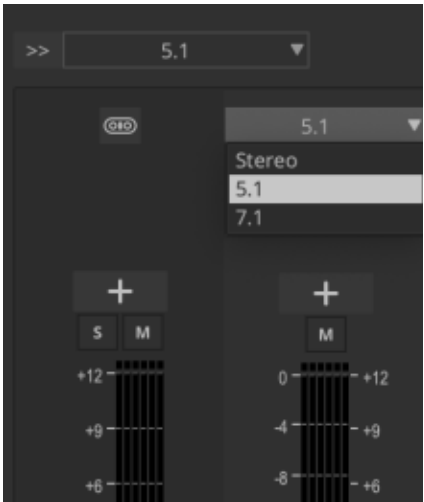

Change these audio mixer settings for the source and record side
Set the "Monitor Mix Format" to 5.1 SMPTE: L R C Lfe Ls and Rs

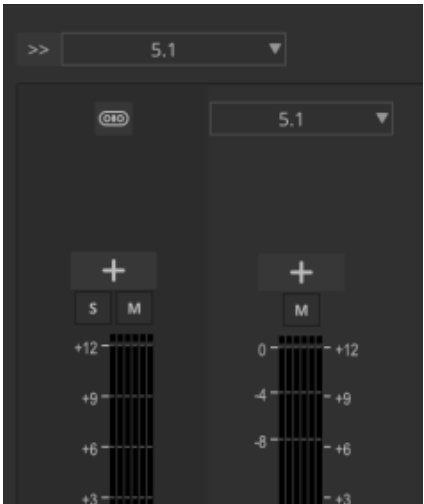

Note if you are on a laptop or a computer w/o surround sound hardware connected you won't be able to set the "Monitor Mix Mode" to surround you will just leave it stereo

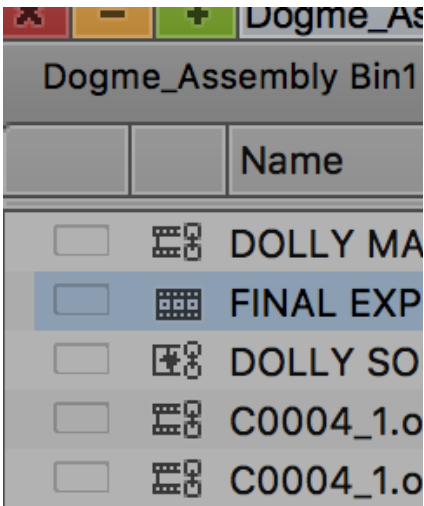

Set the "Sequence Mix Mode" side to 5.1 as shown here

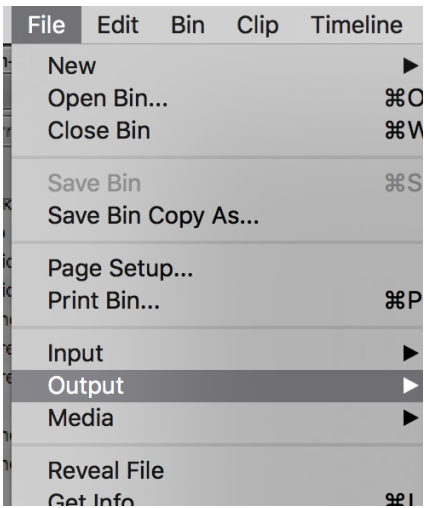

Close the Audio Mixer

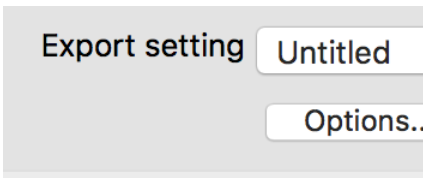

Export the timeline
Select the Sequence to export that has the video mixdown with the 5.1 audio

Go to >File>Output>Export to File

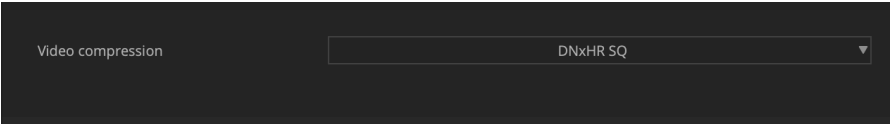

Click on Options

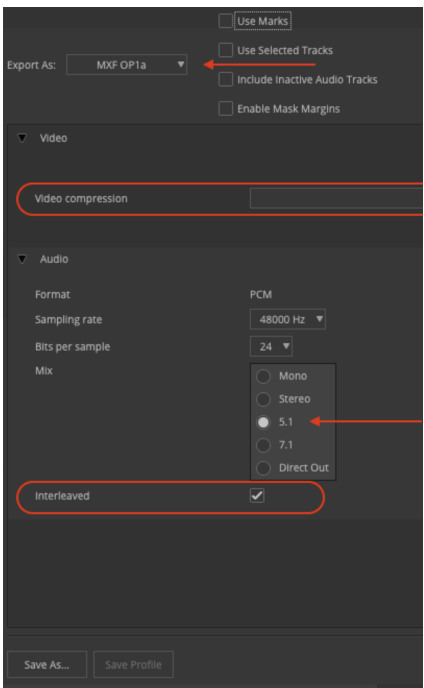

Choose MXF OP1a

Video Compression choose DNxHR SQ

Mix is 5.1

Make sure Interleaved is checked

Choose a place to save the file choose

And Choose Save
