Note about dual displays with the Belkin Thunderbolt 2 Dock: At least one display has to be Thunderbolt or Thunderbolt 2 technology-ready. For displays that are not Thunderbolt technology-ready, the Thunderbolt port is backwards compatible with Mini DisplayPort. The dock supports either HDMI or Mini DisplayPort, but not both. We are working on another recommendation.

Note: Some of the following computers require modifications to the specs. Prices are subject to change but modified specs will remain constant. Please note any necessary changes below the model; If no changes are found, then add to your cart as-is.
