

# Classrooms (ASE 1.124, 1.126, 2.134)

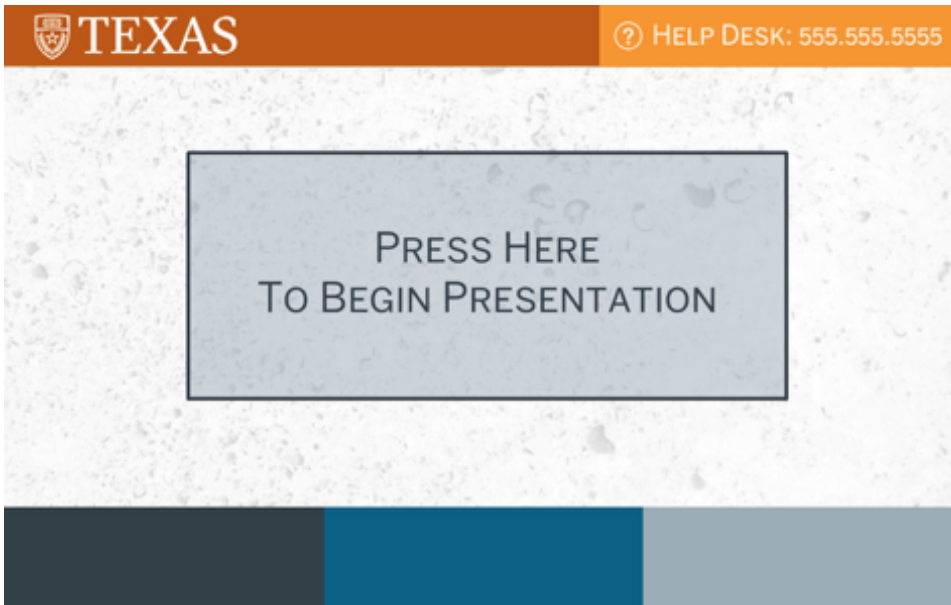

The classrooms have dual projectors, HDMI connection, AirMedia, doc cam, a podium computer with a webcam on the podium monitor, and [lavalier lapel microphone](#).

The ASE 1.126 classroom also has a [handheld microphone](#).

NOTE: The room web conference camera and microphones are connected to the podium computer

Laptops and mobile devices can connect to the projectors using either the HDMI connection or [AirMedia wireless](#) option.

- Use the console to control the room AV. If screen is blank, tap screen to wake it up.

- The default option is to display the podium computer on both screens
- The [advanced video options](#) allows separate control of each projector
- Use the mouse to wake the computer screen
- Logon using your UT EID

- In the video conferencing software, select Crestron as the output device
  - In ASE 1.124 and 2.134, select Scarlett 2i2 USB for the lapel mic
  - In ASE 1.126, select TesiraFORTE for the lapel or handheld mic
- To display from a laptop or tablet connect the HDMI cable to the device. If necessary use one of the items on the [HDMI adapter ring](#).
- Select Display HDMI to send to both screens.

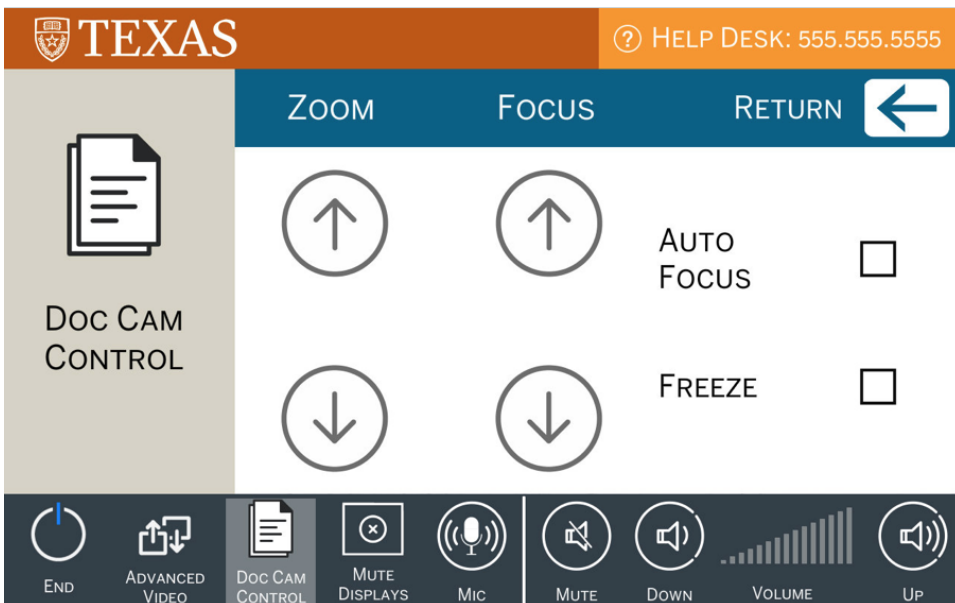

- Select [Display AirMedia](#) to send to both screens

- Select Display Doc Cam to send to both screens

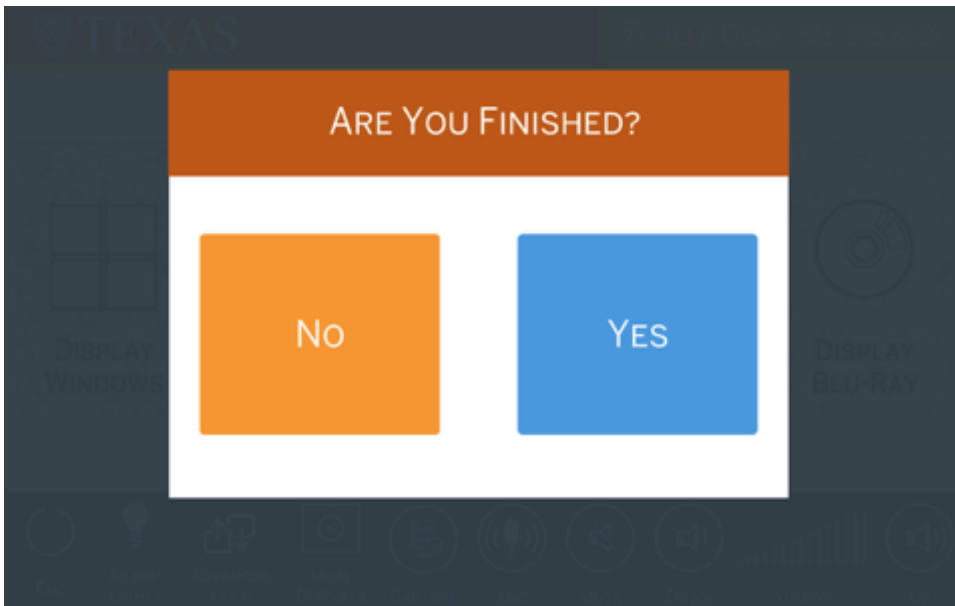

- Select Doc Cam Control from the bottom toolbar to access doc cam controls
- select button to return to main screen

- Select End on the control toolbar to turn off the projectors and raise screen

- Select Yes to turn off AV system

## Advanced Video

The advanced video option allows separate control of each projector.

- Select Advanced Video on the control toolbar

- Choose the video source to send to each projector
- Turning a projector off will raise the corresponding screen. Turning on lowers the screen.
