Crestron AirMedia

The AirMedia provides wireless connectivity to the wall display from Windows, macOS, iOS and Android devices.

NOTE: AirMedia requires being connected the utexas wireless network

- Download the AirMedia client the first time connecting
 - macOS & Windows Open a web browser and go to the link listed on the display
 - iOS (iPad & iPhone) Download AirMedia app from the App Store

Open the installed AirMedia client and enter the wall display address:

- Windows
- macOS
- iOS (iPad & iPhone)
- Android

Windows

• Open the AirMedia client

The client file name includes the IP address of the AirMedia device it was downloaded from. Opening this client file will automatically connect to the address in the file name.
