Having Trouble Installing Zoom on Your Computer?

- Please visit the following page of our step-by-step wiki for details on this: [Getting Started with Zoom](#)
-

Zoom Does Not Open to my UT Account on my Computer

- Open Zoom
- If you are signed in, sign out (click on your Avatar, select sign out)
- Now DO NOT USE THE EMAIL OPTION, click on the Sign in with SSO button

- Go through the authentication process, now zoom will use your UT account.

Zoom Login Verification

To verify that you are logged into your UT licensed Zoom Account please visit [Zoom Login Verification](#)

How do I make sure I'm using my UT Zoom Account

1. Log into your <https://utexas.zoom.us/profile> and make sure you log in with your UTEID and password.
2. Click the avatar in the top right corner of your profile

3. When you click on the avatar it should show a pop-up like the below that identifies you're using an "licensed" account

4. Once you confirm you're in your UT Zoom profile, click the *Edit* in the top section of your profile

5. Add " - UT" to the end of your last name and then save.

The screenshot shows the Zoom profile settings interface. On the left is a profile picture of a man with a 'Change' and 'Delete' button below it. To the right are input fields for 'First Name' (containing 'Clint') and 'Last Name' (containing 'Tuttle - UT', which is circled in red). Below these are 'Phone' settings, including a dropdown for 'United States of America (+1)' and a 'Phone Number' field.

Now run a test - Now the next time you log into a meeting, turn on your camera and it should show your name in the bottom left corner of your camera window. It should read FirstName LastName - UT (e.g. Clint Tuttle - UT). If you don't see the " - UT" then you've probably logged in with your non-UT account.
