

ProTools - How to Connect the IPAD and the S3 Console to your ProTools Computer

Turn on the S3 and the IPAD Dock might be powered off

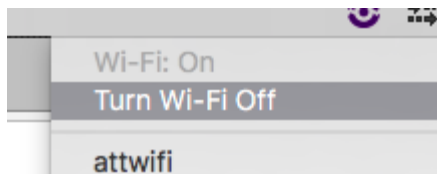

Power switch is at the back of the unit

Turn on the S3 and the iPad Dock might be powered off

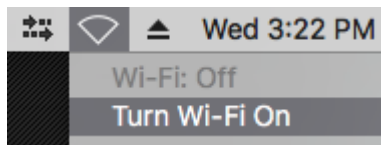

Power switch is at the back of the unit

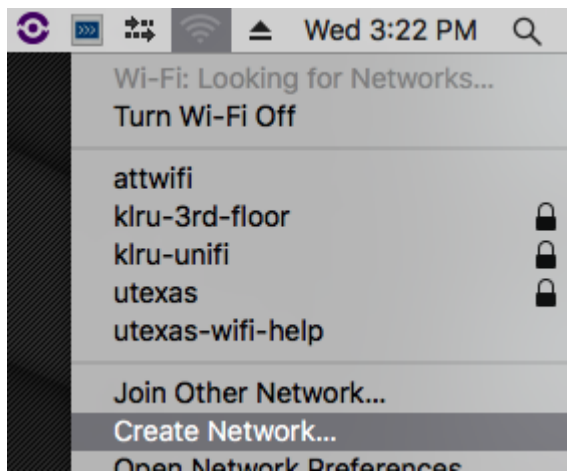

If the Wi-Fi of the computer is already ON, turn the Wi-Fi OFF

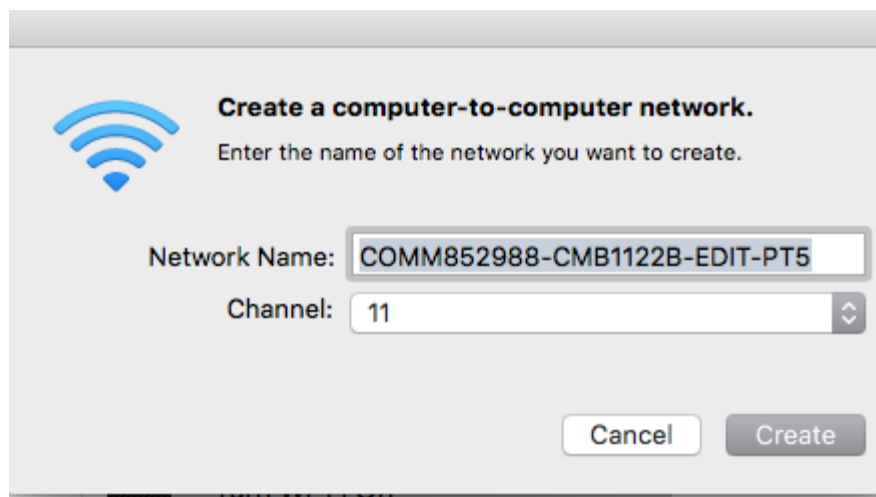

Turn the computer Wi-Fi ON

Go to the Wi-Fi icon and click on > Create Network

The default settings (for the Network Name and Channel ID) are fine. Click "Create"

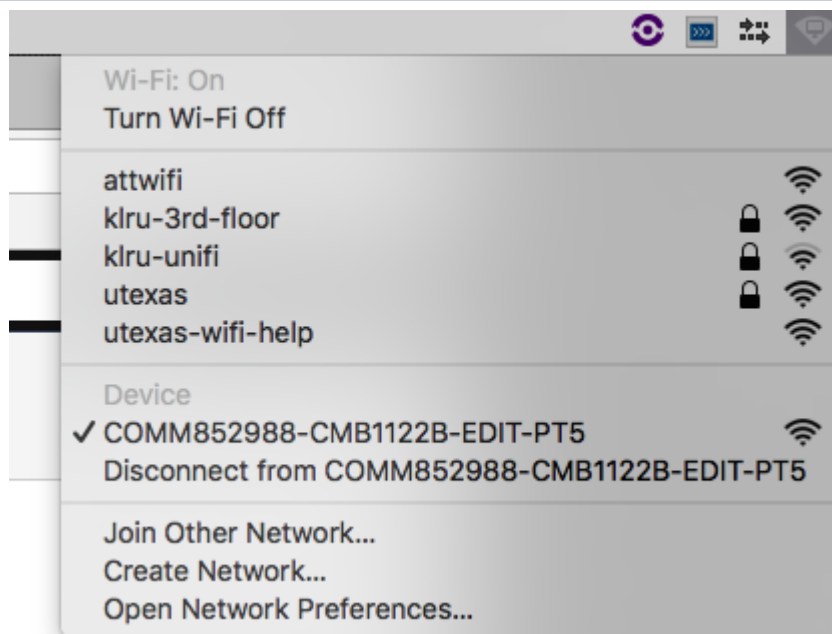

Create a computer-to-computer network.
Enter the name of the network you want to create.

Network Name:

Channel:

Confirm that you are connected to the network that you just created

Wi-Fi: On
Turn Wi-Fi Off

On the iPad, open the PT Control Application

If you do not have the app installed download it from here

<http://www.avid.com/products/portal-control>

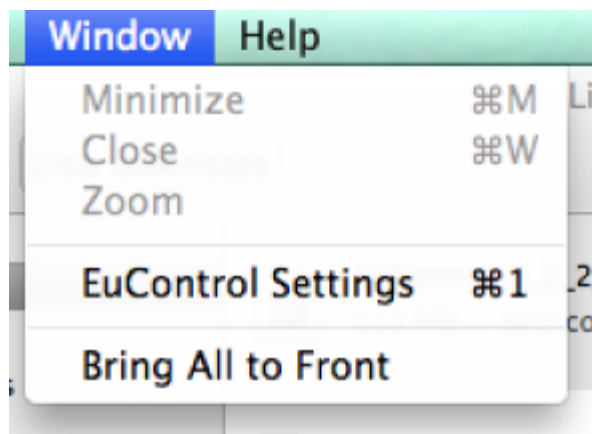

This step will set up the S3 console on the computer, launch the EuControl application.

Once the application is running, go to > Window > EuControl Settings

The Surface should list 3 devices: AVID D S3
PT Dock
Your iPad
PT Control App

It should look similar to the picture on the right.

The Workstation Tab should list the computer that is connected
