Prerequisites

Course prerequisites will be enforced in the registration system. Faculty who wish to allow a student without the stated prerequisite into their course may submit their request via this form. Those permissions will be submitted into the registration system by Moody Student Advising in time to allow students to attempt to add themselves to the course during the add/drop period directly preceding the semester. This procedure prioritizes students with the stated prerequisite during the fall registration period. Given that we often don't have enough capacity for students who meet the prerequisites (our own majors), we want to ensure that we are supporting timely graduation efforts.
