

# Faculty Publications

The **Faculty Publication System** is a searchable database of faculty publications which is easily accessible via the web. This system is designed for use by students and the media as an information resource that is accessible via an easy to use web interface.

Using the **Faculty Publication System** will allow you to:

- Require users to log in before being able to access online publications.
- Validate user accounts against the McCombs School of Business Server securely using UT-EID authentication.
- Provide a comprehensive online guide to the publications authored by members of the McCombs faculty.
- Log system usage and other activity.
