

# Shotlists

A shotlist is a less formal alternative to the storyboard; a brief list that details the intended shots.

This should detail everything that needs to be shot for complete coverage, IT SHOULD NOT BE AN EDIT DECISION LIST!

A less formal alternative to a storyboard. It lists briefly written descriptions of the intended shots. It is the minimum that will serve the purposes of shaping a scene. For people who can visualize from it, the shot list can be as instructive as a storyboard.
