More Customization Options

Set up the Camera

To stream an event you will need the following:

- A laptop with [Livestream for Producers](#)
- A Panasonic HMC-150 (or camera with HDMI)
- Blackmagic H.264 Pro Recorder (probably in the booth behind the BMC auditorium)
- HDMI cable
- USB cable (USB-A to USB-B mini)

A microphone plugged into the camera will also be needed for higher quality audio.

Use the diagram below for hooking it up

Always use a wired Ethernet connection rather than WiFi if possible. Note that UT WiFi is bandwidth limited and your access will be terminated for the rest of the month if you use all your bandwidth.

For hooking up in BMC 2.106 Auditorium

On rear of mobile TV system, connect HD-SDI or HDMI PGM Out to streaming encoder

Start the Stream

Launch LiveStream for Producers

Enter the account username and password

Found here:

https://stache.security.utexas.edu/login_ted.jsp

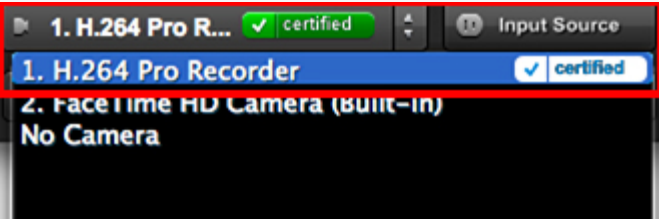

Choose your event

From the drop down menu

choose the newly created event.

<p>Choose the camera</p> <p>From the drop down menu choose H.264 Pro Recorder</p>	
<p>Set the quality level</p> <p>On most laptops, choose Large, Medium, Mobile.</p> <p>Note that choosing HD quality will often overtax the system and crash the program.</p>	
<p>To begin streaming click the GO LIVE button</p>	
<p>At the end of your event, Choose to delete or keep the recording.</p> <p>Note that you can keep the recording but not publish it if desired.</p> <p>This keeps the public from seeing it but allows you to download it later or trim the beginning & end before posting it.</p>	
<p>Trim the start & stop of the archive on livestream</p>
