

How to update Firefox on a Mac

Log in to the Mac	 The image shows the Mac OS X login screen. It features a dark grey background with a white Apple logo at the top center. Below the logo are two white input fields: one labeled 'Name' and one labeled 'Password'.
Launch the Application Firefox	 The image shows the Firefox application icon, which is a stylized orange and yellow fox head encircling a blue and white globe.
From the menu, select Firefox > About Firefox	 The image shows the top of the Firefox application window. The title bar contains the text 'Firefox File Edit View'. Below the title bar, the 'About Firefox' menu item is highlighted in a blue bar.
The About window will open. Wait for it to download the update. aprox. 10 seconds	 The image shows the 'About Firefox' window. On the left is the Firefox logo. On the right, the text reads 'Firefox 11.0' followed by an 'Apply Update' button. Below this, it says 'You are currently on the release update channel.' and 'Firefox is designed by Mozilla, a global community working together to keep the Web open, public, and accessible to all.' At the bottom, there are links for 'License Information', 'End User Rights', and 'Privacy Policy'.
Select 'Apply Update'	 The image shows a close-up of the 'Apply Update' button from the About window. The button is rectangular with rounded corners and a blue border.
Firefox will relaunch. Quit Firefox when it is completed.	 The image shows the Firefox application icon, identical to the one in the second row.
