

TCS Startup

Night logs:

For night logs you must sign-in to the 'Dell' system: open a terminal, and type >dr

Fill in your night logs, but do not submit them. The day crew will submit the logs.

TCS:

TCS is ran on the middle Sun stations:

sign in with your observer account

open a terminal and run >wx_gui

open a Firefox window to view:

The MONET all-sky cam : http://monet-n-sky.as.utexas.edu/view/viewer_index.shtml

Simbad: <http://simbad.u-strasbg.fr/simbad/>

IRTF A0 tool: http://irtfweb.ifa.hawaii.edu/cgi-bin/spex/find_a0v.cgi

Run the TCS by clicking on the button along the bottom of the screen.

Click the 'inactive' button on TCS to activate it

under View, select 'view sky plot'

[Open the dome following the procedures.](#)

under Tools, 'enable dome automation'

Go to your target following the [Telescope Pointing Procedure](#)
