

Find Files on Mock Scan Computer

Make sure that you run E-primes from the computer, NOT from Austin Disk. The file are all under Local Disk (C:)>Users>Public>Public Documents>Booth. Here you will find the CTOPP files, mock scan E-primes, and movies.	
I highly suggest that you right click on each of these folders (CTOPP, E-primes, Movies) and choose "Create Shortcut", then paste these on your desktop. This way you have a direct link to these files that is easily accessible on your desktop. However, do NOT simply copy and paste the E-primes to your desktop (instead of using a shortcut). If you do this, then when I update the E-primes and copy them over, you will still be using an old version. Please let me know if you need help with this!
