Neurosciences Interest Group

The former Neurology, Neurosurgery (AANC Chapter), and Psychiatry Interest Groups have joined together to form the Neurosciences Interest Group, also known as SIGN (Student Interest Group in Neurology).

Our small but mighty group encourages interest in the field of neurology and reaches out to local elementary and middle school students to learn more about neuroscience. In partnership with Dr. Steffensen (MS1 Medical Neuroscience course director and neurologist) and Austin ISD, last year we led educational programs for Austin students to teach them about the brain. Dell volunteers led stations on brain imaging, demonstrated the brain's structure with sheep brains, and more.

We also connect Dell students with opportunities to learn more about and engage with the clinical side of neurology, particularly through advertising regular Neurology/Neurosurgery Grand Rounds speakers at the hospital. We hope to have more speaker events specific to our SIGN group in the future.

Reach out to Matthew or Faith via email to get involved!
